

Summary

Results-driven Computer Engineering Graduate with hands-on industry experience in the semiconductor sector. Specializes in Test Development Engineering, Test IT Operations and Application Development, with a strong foundation in circuit design, embedded systems and hardware-software integration. Proven track record of developing applications (C#/.NET), supporting server migrations, and activities maintaining automated test equipment. Eager to support engineering teams by resolving issues and maintaining system stability.

Experience

Apprentice Engineer

Amkor Technology Philippines Inc.

Test Development Engineering – Test IT (Developer/Support).

Oct 2025 - Mar 2026

- **Software Development:** Engineered a secure desktop application for managing engineering credentials from scratch using C#, .NET, and SQL. Handled the full lifecycle from concept, UI design to database creation, implementing role-based access control, inventory sharing, encryption, audit logs and handled legacy system compatibility to support older engineering workstations.
- **Server & Network Migration:** Supported server migrations by updating FTP credentials, validating IT Apps linkages, and configuring network settings to ensure zero downtime.
- **System Maintenance:** Performed setup and scanning on tester and handler devices using TXOne Portable Inspector for preventive maintenance of ATEs, and executed disk backup, cloning and recovery with Acronis True Image.
- **Process Automation:** Practiced developing AutoIt and Office scripts to automate repetitive tasks.
- **Data Analysis:** Classroom training of 7QC tools and Basic SPC to analyze yield data.

Group Leader

CvSU - Carmona Campus

Undergraduate Thesis

Sep 2024 - Jun 2025

- **Title: ARNISENSE: A Sensor-Integrated Training Dummy with Wearable Sensors for Monitoring of Basic Arnis Techniques for CvSU-Carmona Athletes.**
- Designed and built a sensor-integrated training dummy with impact sensors and motion trackers for **real-time strike monitoring** and engineered custom circuitry system for data acquisition and wireless transmission.
- Developed a **Python** application for **RaspberryPi based system** that processes sensor data into performance metrics and a gamified UI, reducing manual assessment time.

IT Department – Intern

City Government of Carmona

On-the-job Training (240hrs)

Aug 2024 - Sept 2024

- Trained in **GIS** using **QGIS** to create, analyze, and visualize spatial data for interactive mapping.
 - Trained to design and develop a website, with **Elementor** framework and applying **HTML, CSS, and JavaScript**.
 - Applied IP networking concepts and executed **Basic Cisco Commands** using **Cisco Packet Tracer**.
-

Education

Bachelor of Science in Computer Engineering City of Carmona, Cavite

Cavite State University - Carmona Campus | GPA: 1.546 | Cum Laude

Sep 25, 2025

Relevant Coursework:

- Hardware - Digital Electronics, Logic Circuits, Embedded Systems Design, Circuit Design, Circuit Analysis.
 - Software - Data Structures & Algorithms, Operating System Concepts, Software Design Principles.
 - Systems - Computer Architecture, Network Protocols & Security, Digital Signal Processing.
-

Technical Trainings & Certifications

Amkor Technology Philippines (2025–2026): Test Process Orientation, 7QC Tools, Basic SPC, Process Control

TESDA: Programming NC IV (1044 hrs)

DICT Region IV-A (2024): IP Networking, Cybersecurity, Blockchain 101, Javascript Essentials 1

IBCC Scholar (2021–2025): Member

Soft Skills: Effective Communication (Email and Team Collaboration), Problem-Solving, Time Management and Adaptability.

Tools & CAD: Altium, AutoCAD, KiCad, MS Office, Visual Studio, SSMS, GitHub/Gitea.

Programming: C#, Python, C/C++, SQL, JavaScript, HTML/CSS, AutoIt.
